

# GOOD PASSWORD CYBERSECURITY TIPSHEET

1. **Don't** use names of pets, birthdays etc

2. **Don't** use common passwords that are easy to guess like QWERTY

3. **Don't** use the same password on all online accounts. **Make it Unique**

4. **Do** aim for password length at least 10 to 12 characters. **Make it strong**

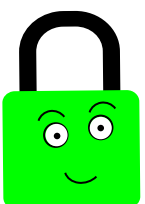

5. **Do** use a mixture of Uppercase and lowercase letters and numbers

6. **Do** use special characters like: \$@£\*&. **Make it complex**

7. **Do** use a phrase that is memorable and easy to remember like: (!Lik2Sw!!m

8. **Do** use two Factor Authentication as an added layer of protection
