

# PUBLIC Wi-Fi SAFETY TIP SHEET

- 1** Be careful of Wi-Fi hotspots with similar names, always ask to make sure it is the right one.
- 2** Make sure the connection requires user authentication with encryption
- 3** Use an encrypted Virtual Private Network service (VPN) when accessing personal information.
- 4** Adjust your mobile device so that it doesn't automatically connect to nearby Wifi hotspots
- 5** Make sure all websites visited have https:// before the address. This means your information will be encrypted
