

WORK FROM HOME CYBERSECURITY TIP SHEET

1

Secure your router with a strong password and WPA2 security.. Use a guest network for anyone that has to use your network

2

Always log out of your computer if you have to step away from it or leave it unattended

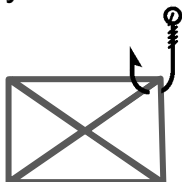

3

Don't print documents and work on them in public places like on the train, bus etc

4

Beware of phishing emails and scams that are designed to trick you into revealing personal information. Ignore any email you are unsure about

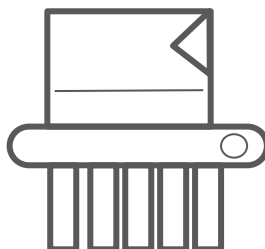

5

Use a VPN connection if you are using a public or insecure network

6

Don't throw away sensitive papers, shred them if possible

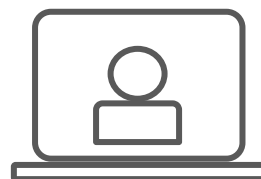

7

Don't have business conversations in public places. If you do then hold them somewhere discreet

8

Do not allow anyone access to your work computer even family members

9

Encrypt sensitive files before sending sharing them with the recipients
